### Denture Care

### Denture Care

### Advantages of Dentures

1. Less expensive.
2. Replace teeth and soft tissues.
3. Easy to clean.
4. Easy to adjust and repair.

### Disadvantages of Dentures

1. Takes longer to get comfortable.
2. Inconvenient.
3. They tend to move while eating.
4. Some people have hard time wearing them.

### Final Advices

- Any dental procedure that is done with proper diagnosis and attention to the details during execution should have good long-term prognosis.

All treatment options have advantages and disadvantages.

We are dealing with biology; there is no absolute answer for a problem.

### Ultimate Advice

- Prevention is always better than treatments.
- Keep up with good daily oral hygiene.
- Regular dental check-up and maintenance.

### THANK YOU

- Any questions?
